CCI 400

- CCI 400
- VDT
- Proof Printer
- Console
- On-Line Interface
- Disk
- Streamer Tape

OVERVIEW

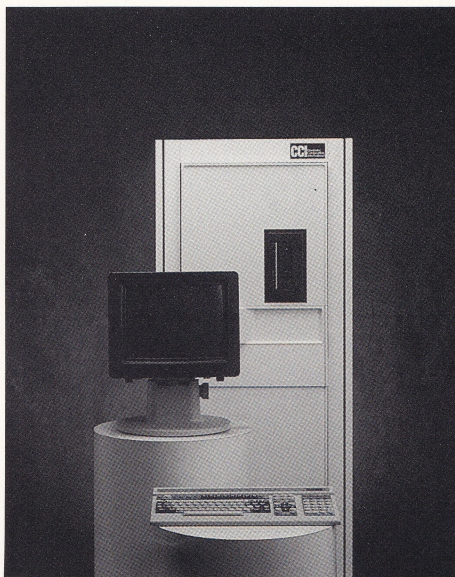

The CCI 400 is a high performance technologically advanced system that delivers interactive operation and high capacity disk drives. On-site training and installation plus an impressive set of software programs are delivered with each CCI 400. The CCI 400 can handle thirty-two 400 or 400E input terminals, over a gigabyte of storage, the complete line of CCI hardware and a full compliment of programs so that each CCI 400, whether the biggest or smallest configuration, packs enough power to perform the most complex job with ease.

APPLICATION OVERVIEW

Many of our base of over 250 customers use the CCI 400 in a variety of ways—everything from ad typographers, to book publishers, to banks. And the CCI 400 is modular so that it can adapt to their needs.

Commercial: The CCI 400 permits the user to address the full spectrum of commercial applications with the same system. Ad work, magazine and book work, telecommunications and database tasks can be done simultaneously.

Inplant: The modular architecture of the CCI 400 system permits the user to begin with a complete and sophisticated system that can grow along with the departments or companies growth path.

HIGHLIGHTS

- Multix Operating System

FEATURES and BENEFITS

32 Vdt potential

So that the system will grow to the size of your current and future needs.

Interactivity

Rapid feedback leads to much increased production.

Operator Statistics

The CCI 400 automatically keeps track of the keystrokes, revisions, time spent and operator's initials on every job in the system.

Complete set of publications programs

So you can handle pagination needs from magazine to book.

XY

Permits complex makeup in a fraction of the time.

A Turnkey System

Equipped with the tools necessary to tackle the spectrum of composition applications without continuous upgrade and reinvestment. In fact, on-site training and installation are delivered standard. And, CCI guarantees, in writing, that our software will live up to your expectations.

Delivered with the 400E Vdt

A 15", back-lighted, ergonomically designed configuration that increases operator efficiency.

SPECIAL CONSIDERATIONS: Systems that support it: N/A. Environmental: Office. Modem Type: Bell Compatible. Memory Consideration: Delivered with 384kb. Mux Channels: 8 standard. Communication protocol: Async/bisync.
